- Indicate any hazardous waste processes, by process code, which have been omitted from Part A of the facility's permit application.
- Indicate any hazardous waste processes (by process code and line number on EPA Form 3510-3 page 1 of 5) which appear to be eligible for exclusion per 35 Ill. Adm. Code 725.101(c). Provide a brief rationale for the possible exclusion.

## REMARKS

Use this section to briefly describe site activities observed at the time of the inspection. Note any possible violations of Interim Status Standards.

Beloit Corporation has determined that the waste on-site is hazardous. Therefore, a record review of the May 13, 1986 ISS inspection has been performed. Violations are as noted on the attached page.

A closure plan was also submitted with the hazardous waste determinations so that regulation (725.212) was not cited as violated even though it was at the time of the inspection. The submittal of a closure plan also satisfies the request for a response to the CIL that was issued with this record review. Therefore, no further response to this report is required.
